A. Introduction

The External Evaluation Committee (EEC) visited the Intercollege campus in Nicosia (Cyprus)

last 30 May 2019. The visit took place according to the following schedule:

• meeting with the Head of the Institution and the members of the Internal Evaluation Committee

• examination of the School's structure

• meeting with the program Coordinator. Presentation of the curriculum

• presentation of program's feasibility study

• discussion of the program as a whole and information relevant to its response to the Criteria

• presentation of the equipment used in teaching and learning

• presentation of the academic/teaching staff teaching each course for all the years of study

• examination of the curriculum vitae of the academic/teaching staff and their relationship with the institution as teachers in connection with any other duties they may have in the institution or/and other programs

• a meeting only with members of the teaching staff

• a meeting only with students' representatives

• a meeting with members of the administrative staff

• on site visit to the premises of the institution (library, computer labs, research facilities etc.).

B. External Evaluation Committee (EEC)

Name	Position	University
Prof Mauro Velardocchia	Chair	Politecnico di Torino, Italy
Prof John Allport	Member	University of Huddersfield, UK
Prof Aldo Sorniotti	Member	University of Surrey, UK
Student Michalis Mavros	Member	University of Cyprus
Mr. Michalis Fountoulis*	Member	Dept. of Electromechanical Services

* The representative of the Regulatory Body takes part to the External Committee only to evaluate that the program to be examined does not contradict the provisions (if applicable)

of the relevant Legislation (οι περί των Τεχνιτών Οχημάτων Νόμοι) and he does not express an opinion on the program's content.

1. **Study programme and study programme's design and development**
   (*ESG 1.1, 1.2, 1.8, 1.9*)

Standards

- *Policy for quality assurance of the programme of study:*
  - *has a formal status and is publicly available*
  - *supports the organisation of the quality assurance system through appropriate structures, regulations and processes*
  - *supports teaching, administrative staff and students to take on their responsibilities in quality assurance*
  - *ensures academic integrity and freedom and is vigilant against academic fraud*
  - *guards against intolerance of any kind or discrimination against the students or staff*
  - *supports the involvement of external stakeholders*

- *The programme of study:*
  - *is designed with overall programme objectives that are in line with the institutional strategy and have explicit intended learning outcomes*
  - *is designed by involving students and other stakeholders*
  - *benefits from external expertise*
  - *reflects the four purposes of higher education of the Council of Europe (preparation for sustainable employment, personal development, preparation for life as active citizens in democratic societies, the development and maintenance, through teaching, learning and research, of a broad, advanced knowledge base)*
  - *is designed so that it enables smooth student progression*
  - *defines the expected student workload in ECTS*
  - *includes well-structured placement opportunities where appropriate*
  - *is subject to a formal institutional approval process*
  - *results in a qualification that is clearly specified and communicated, and refers to the correct level of the National Qualifications Framework for Higher Education and, consequently, to the Framework for Qualifications of the European Higher Education Area*
  - *is regularly monitored in the light of the latest research in the given discipline, thus ensuring that the programme is up-to-date*
  - *is periodically reviewed so that it takes into account the changing needs of society, the students' workload, progression and completion, the effectiveness of procedures for assessment of students, student expectations, needs and satisfaction in relation to the programme*
  - *is reviewed and revised regularly involving students and other stakeholders*

- *Public information (clear, accurate, objective, up-to date and readily accessible):*
  - *about the programme of study offered*
  - *the selection criteria*
  - *the intended learning outcomes*
  - *the qualification awarded*

> - *the teaching, learning and assessment procedures*
> - *the pass rates*
> - *the learning opportunities available to the students*
> - *graduate employment information*

Findings

The former experiences of the teaching staff members are mainly focused on Diploma level. The Higher Education Institution (HEI) presents a reasonable approach to developing educational programmes. Based on the HEI experience on other programmes, the internal quality assurance processes are in place.

Strengths

The study programme is based on a balanced approach with both theoretical and vocational focus.

The strategy is coherent with the institution objectives.

The courses are influenced by external stakeholders and are responding to the requirements from outside. The links with industry potentially allow for good results in terms of placements. The programme gains from support coming from UNIC.

The low student/staff ratio will permit appropriate student supervision, as well as mentoring both for lectures and for internship.

Areas of improvement and recommendations

Given that the teaching material is not yet available, future validation should be required once the programme is fully developed.

Mark from 1 to 10 the degree of compliance of each quality indicator/criterion

1 – 4: Non-compliant

5 or 6: Partially compliant

7 or 8: Substantially compliant

9 or 10: Fully compliant

	Quality indicators/criteria	1 - 10
1.1	Academic oversight of the programme design is ensured	8
1.2	The guide and / or the regulations for quality assurance provide the adequate information and data for the support and management of the programme of study for all the years of study.	8
1.3	Internal Quality Assurance processes safeguard the quality and the fulfillment of the programme's purpose, objectives and the achievement of the learning outcomes. Particularly, the following are taken into consideration:	

	1.3.1	The disclosure of the programme's curricula to the students and their implementation by the teaching staff	8
	1.3.2	The programme webpage information and material	N/A
	1.3.3	The procedures for the fulfillment of undergraduate and postgraduate assignments / practical training	8
	1.3.4	The procedures for the conduct and the format of the examinations and for student assessment	8
	1.3.5	Students' participation procedures for the improvement of the programme and of the educational process	9
1.4	The purpose and objectives of the programme are consistent with the expected learning outcomes and with the mission and the strategy of the institution.		6
1.5	The following ensure the achievement of the programme's purpose, objectives and the learning outcomes:		
	1.5.1	The number of courses	6
	1.5.2	The programme's content	8
	1.5.3	The methods of assessment	9
	1.5.4	The teaching material	8
	1.5.5	The equipment	9
	1.5.6	The balance between theory and practice	8
	1.5.7	The research orientation of the programme	5
	1.5.8	The quality of students' assignments	8
1.6	The expected learning outcomes of the programme are known to the students and to the members of the teaching staff.		9
1.7	The teaching and learning process is adequate and effective for the achievement of the expected learning outcomes.		6
1.8	The content of the programme's courses reflects the latest achievements / developments in science, arts, research and technology.		6
1.9	New research results are embodied in the content of the programme of study.		6
1.10	The content of foundation courses is designed to prepare the students for the first year of their chosen undergraduate degree.		N/A
1.11	Students' command of the language of instruction is appropriate.		9

1.12	The programme of study is structured in a consistent manner and in sequence, so that concepts operating as preconditions precede the teaching of other, more complex and cognitively more demanding, concepts.	6
1.13	The learning outcomes and the content of the courses are consistent.	8
1.14	The European Credit Transfer System (ECTS) is applied and there is correspondence between credits, workload and expected learning outcomes per course and per semester.	6
1.15	The higher education qualification awarded to the students corresponds to the purpose, objectives and the learning outcomes of the programme.	8
1.16	The higher education qualification and the programme of study conform to the provisions for registration to their corresponding professional and vocational bodies for the purpose of exercising a particular profession.	N/A
1.17	The programme's management in regard to its design, its approval, its monitoring and its review, is in place.	9
1.18	The programme's collaborations with other institutions provide added value and are compared positively with corresponding collaborations of other departments / programmes of study in Europe and internationally.	N/A
1.19	Procedures are applied so that the programme conforms to the scientific and professional activities of the graduates.	9
1.20	The admission requirements are appropriate.	10
1.21	Sufficient information relating to the programme of study is posted publicly.	N/A
1.22	The teaching methodology is suitable for teaching in higher education.	7

Justify the numerical scores provided for the quality indicators (criteria) by specifying (if any) the deficiencies.

- *The programme webpage information* **and material is not yet available, due to the fact that the programme is new. The teaching material beyond the first semester is not yet available**

- **A BSc is expected as the outcome, but the programme seems focused on a technician level. The HEI should present a more clear and complete plan how they propose to address this. For example, the HEI should clarify how progression from basic to advanced level can be developed both in terms of prerequisites and depth of knowledge**

- **The number of courses could be optimized, also considering the former point. The overall programme appears to be aimed at developing breadth more than depth**

- **The research orientation of the programme is minimal as most of the staff is not research active**

- **The teaching and learning process should be based on more ambitious learning outcomes, adequate to a BSc level**

- *The content of the programme's courses reflects the latest achievements / developments in science, arts, research and technology. New research results are embodied in the content of the programme of study.* **Although some courses refer to new trends in automotive technology, some required textbooks are not the latest. Moreover, the staff could be further involved in research to inform and to update the teaching**

- *The European Credit Transfer System (ECTS) is applied and there is correspondence between credits, workload and expected learning outcomes per course and per semester.* **All courses are estimated with the same ECTS number without a clear relationship between outcomes, knowledge progression and contents. The HEI should review how the contents reflect more precisely the student workload in terms of ECTS**

- *The teaching methodology is suitable for teaching in higher education.* **Teaching methodology appears to be very traditional. Some more updated teaching methods could be considered**

Provide information on:

1. Employability records – *not applicable due to the fact it is a new programme*
2. Pass rate per course/semester – *not applicable due to the fact it is a new programme*
3. The correspondence of exams' and assignments' content to the level of the programme and the number of ECTS – *see the former notes*

2. **Teaching, learning and student assessment** (*ESG 1.3*)

Standards
- *The process of teaching and learning supports students' individual and social development and respects their needs.*
- *The process of teaching and learning is flexible, considers different modes of delivery, where appropriate, uses a variety of pedagogical methods and facilitates the achievement of planned learning outcomes.*
- *Students are encouraged to take an active role in creating the learning process.*
- *The implementation of student-centered learning and teaching encourages a sense of autonomy in the learner, while ensuring adequate guidance and support from the teacher.*
- *Teaching methods, tools and material used in teaching are modern, effective, support the use of modern educational technologies and are regularly updated.*
- *Practical and theoretical studies are interconnected.*

> - *The organisation and the content of practical training, if applicable, support achievement of planned learning outcomes and meet the needs of the stakeholders.*
> - *Mutual respect within the learner-teacher relationship is promoted.*
> - *Assessment is appropriate, transparent, objective and supports the development of the learner.*
> - *The criteria for and method of assessment, as well as criteria for marking, are published in advance.*
> - *Assessment allows students to demonstrate the extent to which the intended learning outcomes have been achieved. Students are given feedback, which, if necessary, is linked to advice on the learning process.*
> - *Assessment, where possible, is carried out by more than one examiner.*

Findings

The teaching methods are based on lectures, tutorials, practical sessions and workshops. These methods are appropriate to the outcomes. Some more innovative educational technologies could be considered by the HEI for future development.

In general, the assessment methods seem to be appropriate. Independent external moderation would be recommended to ensure that the correct level is reached by students.

Strengths

The HEI members are aware of the needs and requirements of the relevant stakeholders
The combination of practical and theoretical contents
The small class sizes
The practical experience of the staff
The use of internship to develop practical skills

Areas of improvement and recommendations

Use of subject area experts where available to deliver relevant subjects
Development of research to support the teaching
Recommend the adoption of modern teaching methods
To encourage students' critical thinking. The good link with industry could support it through the students' final project, if this should be compulsory

- ***Teaching materials (books, manuals, journals, databases, and teaching notes) meet the requirements set by the methodology of the programme's individual courses and are updated regularly.*** *Several recommended textbooks are not the latest and should be reviewed to evaluate whether more appropriate texts are available*

- ***The programme promotes students' research skills and inquiry learning. Students are adequately trained in the research process.*** **The modules seem to be mainly providing information to students rather than encouraging them in investigation. 3. Teaching Staff (*ESG 1.5*)

Standards

- *Fair, transparent and clear processes for the recruitment and development of the teaching staff are set up.*
- *Teaching staff qualifications are adequate to achieve the objectives and planned learning outcomes of the study programme, and to ensure quality and sustainability of the teaching and learning.*
- *The teaching staff collaborate in the fields of teaching and research within the HEI and with partners outside (practitioners in their fields, employers, and staff members at other HEIs in Cyprus or abroad).*
- *Recognised visiting teaching staff participates in teaching the study programme.*
- *The teaching staff is regularly engaged in professional and teaching-skills training and development.*
- *Assessment of the teaching staff takes into account the quality of their teaching, their research activity, the development of their teaching skills and their mobility.*

Findings

The ratio of full time members of teaching staff involved to the total is approximately 50%. Three members of teaching staff out of thirteen have a PhD degree.

Visiting professors are not indicated in the HEI's Application as teaching staff members. Their involvement could contribute to strengthen the teaching staff.

Strengths

Visiting teaching staff with practical experience

The very small number of students per class

Module feedback from students and peer-review among lecturers

Areas of improvement and recommendations

Research and publication in the subject area of the proposed BSc

Experience in training and teaching in the area of higher education

Details regarding the visiting professors in the area of knowledge

Availability of training in teaching methods and new technologies

- *Adequacy of resources is ensured for changing circumstances (change in student numbers, etc.).*
- *All resources are fit for purpose and students are informed about the services available to them.*
- *Teaching staff is involved in the management of financial resources regarding the programme of study.*

Findings
Generally, resources appear to be adequate.

Strengths
The link with the University of Nicosia and the access to their facilities.

Areas of improvement and recommendations

C. Conclusions and final remarks

These comments and remarks are based on the information available at the time of the accreditation. At that point, there was only teaching material for the first semester and no students had yet been recruited onto the course. No output from examinations, coursework or practical work was available to review.

The teaching staff members former experiences are mainly focused on Diploma's level. The HEI presents a reasonable approach to developing educational programmes. Based on HEI experience on other programmes, the internal quality assurance processes are in place.

The BSc programme proposed can gain from the experience the HEI already has in organizing equivalent level of educational qualification. In particular, the distribution of ECTS credits across the programme could be reviewed.

The teaching methods are based on lectures, tutorials, practical sessions and workshops. These methods are appropriate to the outcomes. Some more innovative educational technologies could be considered by the HEI for future development.

The contextualisation of the learning through the extensive use of workshop practice is to be commended, however, it should be ensured that the academic aspects of the learning are of the correct level. Alternative pedagogical approaches should also be considered in order to make the course compare positively with current international standards and practices.

In general, the assessment methods seem to be appropriate. Independent external moderation would be recommended to ensure that the correct level is reached by students.

As the teaching staff have limited experience in designing assessments at this level, it is suggested that external advice in the form of an external independent examiner be sought.

The ratio of full time members of teaching staff involved to the total is approximately 50%. Three members of teaching staff out of thirteen have a PhD degree. Visiting professors are not indicated in the HEI Application as teaching staff members. Their involvement could contribute to strengthen the teaching staff. Teaching staff could also deepen their subject knowledge through participation in relevant research. If this was in collaboration with visiting professors, then these aims could be achieved simultaneously.

It is recognised that the staff, although experienced in their practical subject matter, have limited teaching experience at degree level. The contribution of visiting professors would not

only support them in terms of technical input, but also in providing examples of good practice in teaching.

In order to encourage students to develop critical thinking skills, it is recommended that the Final Year Thesis be made compulsory. Subject matter for study and subsequent theses could be drawn from the placement periods that the students are engaged in during previous semesters.

Adequate policies and procedures for student admission, progression, recognition and certification are in place and generally resources appear to be appropriate. If the course is to expand numbers in the future, then further laboratory resources will be necessary.

In conclusion, most of the support structure for the course is in place and suitable for a course of this type. However, the detail of the course content needs to be reviewed to ensure that it is of the correct level for a BSc degree, particularly in the later years. It is recommended that further experienced staff, possibly visiting professors, should be involved to facilitate this development.
