INTRODUCTION:

I. The External Evaluation procedure

- Short description of the documents that have been studied, of the on site visit meetings, and of the on site visit to the infrastructures.

I. The External Evaluation procedure

- Short description of the documents that have been studied, of the on site visit meetings, and of the on site visit to the infrastructures.

a) Before the on site visit meetings, the committee received a document number 2001.1 :

- the School's structure, including the program in the proper position, i.e. by indicating the School and the Department under which the program will operate ,
- the curriculum (allocation of courses per semester, weekly content of each course, teaching methodology, teaching material, evaluation, samples of papers, samples of written examinations, admission criteria for prospective students, etc.).
- the academic/teaching staff (academic qualifications, publications, research interests, research activity etc.) and their relationship with the institution as teachers in connection with any other duties they may have in the institution or/and other programs ;

b) During the on site visit the committee was shown :

A Power Point document used to present us the main information on the structure, content and conditions of the program and statistics.

c) During the on site visit of the infrastructures, the committee received a small documentation on the new library and the brochures which present the university to the public in Greek and English.

II. The Internal Evaluation procedure

- Comments concerning the quality and the completeness of the application submitted by the institution of higher education (Doc. Number 200.1), as well as concerning the overall acceptance of and participation in the quality assurance procedures, by the institution in general and by the program of study under evaluation in particular.

The application was quite clear and complete and the meetings were very helpful because they allowed the committee to get all the information regarding the program showing at the same time a loyal participation to the quality of procedure.

FINDINGS:

1. EFFECTIVENESS OF TEACHING WORK – AVAILABLE RESOURCES

Surprisingly, there is no teaching during the Ph.D except a methodological course which is not compulsory and which is primarily proposed to the first year students.

Given the current international state of the Academia, the committee strongly advises to organize the following skills trainings:

1. “How to get funded” given that nowadays research heavily depends on funding
2. “Data management”, which is more and more expected by funding instances.
3. We strongly advise the University to come up with guideline for academic integrity, especially also to guarantee the privacy of persons interviewed and of those who participate to psychological and socio-psychological interviews.
4. The committee is conscious that the teaching professors are not trained to give these courses and advises the University to attract specialists in this field and to set up a University committee on academic integrity.

2. PROGRAM OF STUDY AND HIGHER EDUCATION QUALIFICATIONS

- Purpose and Objectives and learning outcomes of the Program of Study

The PhD program in European Studies provides students with scientific expertise in matters related to both the critical study of Europe today (its institutional frame and policies) and to the cultural studies of the European space *largo sensu*. The program trains students for research and research methodology in compliance with the current requirements of academic knowledge.

- Structure and Content of the Program of studies

Three to four years are devoted to make research and write the Ph.D thesis. At the end of the third semester, an exam allows the teaching staff to verify the capacity of the students to use a bibliography. A second exam at the end of the fourth semester takes the form of a presentation of the work of the student in front of a committee, which can provide advice to improve the quality of the research and its outcomes.

- Quality Assurance of the Program of studies

The quality assurance of the program studies is two fold evaluated.

- a) All suggestions made by the Departments on academic matters are approved by the Senate of the University of Cyprus.
- b) The evaluation of the study programs is conducted within the broader framework of the External Developmental Evaluation, which takes place every five years.

- Management of the Program of Study

The professor May Chehab is in charge of the program.

- International Dimension of the Program of Study

The program is just beginning. The committee hopes the international dimension will become more important through the research cooperation already existing (CONTACT; Shelter; Fos-Mo) ; through invitations of professors who could give lectures. Another possibility, which exists already is the “co-supervising” of thesis – like with Sorbonne Nouvelle.

The project of a European University could give the internationalization a boost. For the moment the students are encouraged to spend one or two semesters in a foreign university.

- Connection with the labor market and the society

The committee wants to emphasize the way some Ph.D students they met can use their thesis to improve their professionalism (either in administration or education). The aim of the thesis is not strictly academic and the committee welcomes this possibility.

Some of the Ph.D students collaborate with the CONTACT program helping to prevent the expansion of hate speech, which is of course highly society for relevant.

3. RESEARCH WORK AND SYNERGIES WITH TEACHING

- Research Teaching Synergies

Three very dynamic programs are open to Ph.D. students. It creates synergies.

4. ADMINISTRATION SERVICES, STUDENT WELFARE AND SUPPORT OF TEACHING WORK

a) Administrative mechanisms: all in accord with national Cypriot laws and standards.

b) Infrastructures / Support

- *Personal infrastructure:* the administrative staff should be composed of two secretaries as before. But, for the moment only one is available, which means a big amount of work, and extra hours which, according to our understanding, are not remunerated.

- *Material infrastructure:*

The building of the department is brand new, even luxurious, with huge offices and nice conference rooms with all modern equipment. Classrooms are equipped with video, Wi-Fi, the furniture is brand new.

- *Welfare of students:*

The University of Cyprus offers free psychological support and counselling services to all students through the Psychological Support Centre (PSC). The prime aim of this service is to contribute to students' welfare in order to ensure that they have the best possible experience during their studies and thereafter.

The Career Office operates as a link between the students of the University of Cyprus and the labour market.

The Health and Safety Department handles all issues related to the health and safety of the University Community.

- A number of student clubs complement life on Campus and enable students to engage in extracurricular activities and hobbies.

- The Career Office operates as a link between the students of the University of Cyprus and the labour market.

The University of Cyprus's ultra-modern Sports Centre aims at developing sport throughout the University Community.

The University runs Student Halls which consist of 12 buildings with a total capacity of 208 single rooms for more than 10 000 students. Extra efforts are to be made for Erasmus students.

- c) One of the main trumps of the Campus is the brand new ultra-modern library *Stelios Ionanou* built by Jean Nouvel, with a 600 000 books collection and a lot of accommodations for the student (individual work, collective study) and for the public. A reading room opens 24 hours a day. There is a room dedicated to effective connection with the E.U databases.

Financial Resources

As a national university, the University of Cyprus has public resources and partially relays to the student fees, which are quite high. The committee hopes that more grants could be offered to incoming students. Actually, there is one grant awarded to a student, who has to teach in BA by a way of compensation.

6. DOCTORAL PROGRAMS OF STUDY

CONCLUSIONS AND SUGGESTIONS OF THE EXTERNAL EVALUATION COMMITTEE¹

- *The present situation of the program, good practices, weaknesses that have been detected during the external evaluation procedure by the external evaluation committee, suggestions for improvement.*
- a) The program is a brand new one, which has still to prove itself. The committee did not have enough materials to express a complete judgement. It did meet however students, who told the committee they were satisfied with writing their thesis and to work with their supervisors, but stressed their difficulties doing so whereas they all had a professional activity. Therefore, the committee advises to undertake efforts to expand the amount of the scholarships whether partial or full.
1. “How to get funded” given that nowadays research heavily depends on funding
 2. “Data management”, which is more and more expected by funding instances.

¹ It is highlighted, at this point, that the External Evaluation Committee is expected to justify its findings and its suggestions on the basis of the Document num.: 300.1. The External Evaluation Committee is not expected to submit a suggestion for the approval or the rejection of the program of study under evaluation. This decision falls under the competencies of the Council of the Agency of Quality Assurance and Accreditation of higher education.

3. We strongly advise the University to come up with guideline for academic integrity, especially also to guarantee the privacy of persons interviewed and of those who participate to psychological and socio-psychological interviews.
 4. The committee is conscious that the teaching professors are not trained to give these courses and advises the University to attract specialists in this field and to set up a University committee on academic integrity.
- b) The students can participate in research programs, something which is highly recommendable.

Quality Standards and Indicators

External Evaluation of a Program of Study

<p>Institution: University of Cyprus</p> <p>Program of Study: PhD of European Studies</p> <p>Duration of the Program of Study: Three years</p> <p>Evaluation Date: 23 02 2019</p>

The present document has been prepared within the framework of the authority and competencies of the Cyprus Agency of Quality Assurance and Accreditation in Higher Education, according to the provisions of the “Quality Assurance and Accreditation of Higher Education and the Establishment and Operation of an Agency on Related Matters Laws of 2015 to 2016”.

The document describes the quality standards and indicators, which will be applied for the external evaluation of programs of study of institutions of higher education, by the External Evaluation Committee.

DIRECTIONS: Note what is applicable for each quality standard/indicator.

1. Poor
2. To an unsatisfactory degree
3. To a satisfactory degree
4. Best practice
5. Excellent

It is pointed out that, in the case of standards and indicators that cannot be applied due to the status of the institution and/or of the program of study, N/A (= Not Applicable) should be noted and a detailed explanation should be provided on the institution’s corresponding policy regarding the specific quality standard or indicator.

FINAL REMARKS – SUGGESTIONS

- *The present situation of the program, good practices, weaknesses that have been detected during the external evaluation procedure by the external evaluation committee, suggestions for improvement.*
 - a) The program is a brand new one, which has still to prove itself. The committee did not have enough materials to express a complete judgement. It did meet however students, who told the committee they were satisfied with writing their thesis and to work with their supervisors, but stressed their difficulties doing so whereas they all had a professional activity. Therefore, the committee advises to undertake efforts to expand the amount of the scholarships whether partial or full.

b) Surprisingly, there is no teaching during the Ph.D except a methodological course which is not compulsory and which is primarily proposed to the first year students. Given the current international state of the Academia, the committee strongly advises to organize the following skills trainings:

- “How to get funded” given that nowadays research heavily depends on funding ;
- “Data management”, which is more and more expected by funding instances.
- We strongly advise the University to come up with guideline for academic integrity, especially also to guarantee the privacy of persons interviewed and of those who participate to psychological and socio-psychological interviews.
- The committee is conscious that the teaching professors are not trained to give these courses and advises the University to attract specialists in this field and to set up a University committee on academic integrity.

c) The students can participate in research programs, something, which is highly recommendable.
